## DevOPs Engineer

Ikeja, 1 00005  / +234 9063467099 / hello@crowsstack.one

2003-07-24

---

## Professional summary

DevOps Engineer with 2 years of experience in optimizing AWS infrastructure and enhancing system security through innovative IAM policies and automated compliance checks. Proficient in system administration and cloud computing, with a strong focus on teamwork to streamline access management and improve operational efficiency. Passionate about mentoring junior engineers and committed to maintaining high availability and business continuity.

---

## Employment history

**JUN 2025 - PRESENT**

**IKEJA**

### DevOps Engineer, DW-Ikeja

- Manage AWS systems, enhancing security with multi-layered access controls.
- Implement automated compliance checks, ensuring adherence to security standards.
- Optimize server reliability with dual-location backups, maintaining 24/7 uptime.
- Develop IAM policies for secure data storage, minimizing unauthorized access.
- Enhance system monitoring using AWS Lambda, automating threat detection.
- Optimized AWS infrastructure by implementing automated compliance checks, ensuring adherence to security standards and reducing manual oversight.
- Analyzed existing AWS configurations to identify vulnerabilities, leading to improved security posture and reduced risk exposure.
- Developed a robust backup system across multiple locations, enhancing website uptime and ensuring business continuity during outages.
- Fostered teamwork by coordinating with my teams to streamline access management, improving operational efficiency and security.
- Dedicated to mentoring junior engineers in AWS best practices, promoting a culture of continuous learning and professional growth.
- Implemented strategic AWS solutions to enhance system reliability, achieving 24/7 uptime and improving overall service quality.

**FEB 2024 - JUNE 2025**

### Technical Support Specialist, Finnew fintech

- Technical support for domain name acquisitionand hosting account setup to establish an online presence.
- Configured SMTP server settings to ensure reliable email communication.
- Analyzed user feedback to identify recurring issues, leading to targeted improvements in support processes and increas edefficiency.

**NOV 2024 - FEB 2025**
**AWKA**

### Technical Support Specialist, Stansat Electronics And Furniture

- Assisted in resolving technical issues forstaff, leveraging skills in network administration and additional technical expertise.
- Administered network systems, performing configuration and optimization tasks to enhance performance and security.
- Provided technical support for Local Area Network (LAN) setup and maintenance

**APR 2023 - AUG 2024**
**AWKA, ANAMBRA**

### IT And Security System Technician, NDY Commulti-Resource Limited

- Installed and maintained CCTV systemstoenhance security and surveillance.
- Configured and managed network switches for efficient data transmission.
- Performed solar and inverter installations to ensure reliable power supply.

---

## Education

Vocational in Cyber Security, 3MTT Fellowship (NITDA)

Vocational in Cyber Security, SID Code Anambra Bootcamp

Vocational in CCTV, Solar And Inverter Installation, 1 Youth 2 Skill Programme

---

## Skills

Amazon Web ServiceExpert

Cloud Computing

Linux

Network Administration

SMTP Server Configuration

IT Operations

Google Cloud Platform

System Administration

## Additional information

### Certifications and Licenses

EXTREME NETWORKS ASSOCIATE

Earners of this badge have learnt about Wireless Networks and their importance to required business outcomes. Students take a deeper dive into the world of wireless, touch on subjects such as design best practices, standards, security and others with the goal of building robust wireless networks.

• Network Design

• Networking

• Networking Fundamentals

• Network Security

• Resilient Networks

• Scaling Networks

• Wireless Networks

### Certifications and Licenses

AWSEDUCATE - NETWORKING

Earners of this badge have completed the Networking training and achieved the required scores on the post-course assessment. They have demonstrated the ability to describe different ways to manage a network and how to use an Amazon VPC to do so.

• Amazon Web Services (AWS)

• AWS Cloud

• AWS Networking

### Certifications and Licenses

AWS EDUCATE WEB BUILDER

Earners of this badge have completed Builder Labs training and achieved the required scores on the post-course assessment. They have demonstrated the ability to describe the overall process of application optimization, which includes App security, database integration and generating reports.

• Amazon Web Services (AWS)

• Architecting Solutions On AWS

• AWS Cloud

• AWS Cloud Building

• Infrastructure On AWS

• Web Applications

### Certifications and Licenses

CYBER SECURITY AND INFOSEC

With so many high-profile data breaches occurring every year, cyber security and information security professionals are in high demand. Time to put on that white hat and start beating criminals at their own game!

• Cyber Security

• Ethical Hacking

• Information Security Management
